Footscray Footbridge – Case Study.

We were approached by Leighton Contractors to manufacture the new footbridge for the Footscray railway station. After much discussion Sutcliffe and Leightons came to an agreement and the Footbridge fabrication started.

Craning the deck out of the factory for transport to site.

Manufacturing of the lift wells in our factory.

Delivery times were critical due to shutdown times for the railways so as not to affect anybody's daily commute. The schedule was strictly adhered too, with all welding being tested and passing to ensure the safety of the structure.

Assembly on site prior to lifting.

Completed lift at Footscray.
